

■ Bananacoin Whitepaper

"Fuel for the Apes. Stack Bananas. Ape Stronger."

September 2025
Bananacoin Foundation

1. Introduction

In the wild jungle of crypto, apes thrive on chaos, memes, and community. Bananacoin (BANA) is the meme coin designed to unite the ape horde under a single

banner: bananas. By combining humor, viral culture, and light utility, Bananacoin offers a token that is fun, sticky, and capable of swinging from branch to branch in the ever-changing crypto ecosystem.

2. Vision

Bananacoin exists to be more than a fleeting joke. It's the official currency of the ape community, a meme coin that fuels games, NFTs, community challenges, and real-world fun — all while staying true to the degen spirit of crypto.

Our vision is simple: Bananas for all.

3. Tokenomics

Ticker: BANA

Total Supply: 69,000,000,000 BANA (because memes).

Decimals: 18

Network: ERC-20 / BSC (multi-chain expansion planned).

Distribution

- 50% Liquidity Pool & Exchange Listings
- 20% Community Rewards & Reflections
- 15% Development & Ecosystem Growth
- 10% Marketing & Partnerships
- 5% Reserve (BananaDAO Treasury)

Transaction Mechanics

- 2% Reflection: Distributed to holders. Apes get more bananas just by hodling.
- 2% Burn: Bananas rot when sold — decreasing supply, increasing scarcity.
- 1% Treasury: Sent to BananaDAO for stunts, community events, and gorilla philanthropy.

4. Utility

Bananacoin isn't just a meme. We're building micro-utility features to keep bananas in circulation:

- BananaSwap: A decentralized exchange (DEX) themed around fruits.
- BananaNFTs: Collectible "Golden Banana" NFTs with staking multipliers and perks.
- Banana Run: Play-to-earn game dodging paper hands.
- Merch Jungle: Banana-branded merchandise.

5. Governance – BananaDAO

Bananacoin is powered by BananaDAO, a decentralized governance system where holders vote on campaigns, partnerships, charity allocations, and roadmap decisions.

One banana = one vote. ■

6. Marketing & Growth

Growth is fueled by memes, challenges, and stunts:

- Meme Army: Daily banana memes across social media.
- Banana Challenges: TikTok & Twitter stunts.
- Influencer Seeding: Sending bananas + BANA tokens to personalities.
- Gorilla Partnerships: NFT artists, small brands, banana farms.

7. Roadmap

- Phase 1 – Planting the Seed
 - Token launch & liquidity pool
 - Meme campaigns ignite
 - 10,000 holders goal
- Phase 2 – Growing the Horde
 - BananaNFTs mint
 - BananaSwap beta launch
 - Banana Run alpha
 - Listings on mid-tier exchanges

■ Phase 3 – Banana Empire

- 100,000+ holders
- Banana merchandise store
- Partnerships with real-world banana suppliers
- First gorilla sanctuary donation via BananaDAO

■ Phase 4 – Bananaverse

- Full metaverse jungle
- Banana Index Fund
- Cross-chain integrations

8. Legal & Risk Disclaimer

Bananacoin (BANA) is a meme coin created for entertainment, community engagement, and cultural participation. It should not be considered financial advice, an investment vehicle, or a guarantee of returns. Cryptocurrencies are volatile and risky. Ape responsibly.

9. Conclusion

Bananacoin is not just another token — it's a culture movement powered by apes, memes, and bananas. Whether you're here for laughs, games, or gorilla-strength community, BANA is your entry ticket to the jungle.

Join the Horde. Stack Bananas. Ape Stronger.
